

**ANYTIME,
ANYWHERE,
ANY DEVICE**

**MANAGING YOUR FACILITIES
AND OPERATIONS**

FACILITIES MANAGEMENT MADE SIMPLE

Across every industry, today's employees expect to be able to work anywhere, anytime, while using any device. However, many organizations still rely on manual methods including paper-based systems, homegrown tools, and spreadsheets to manage their facilities and maintenance management needs.

There's a better way. FMX is a computerized maintenance management system (CMMS) that allows maintenance managers to effectively track and manage all maintenance activities. The software enables you to decrease equipment downtime, schedule preventive maintenance tasks, manage your inventory and assets, and track work orders anytime, anywhere, and on any device.

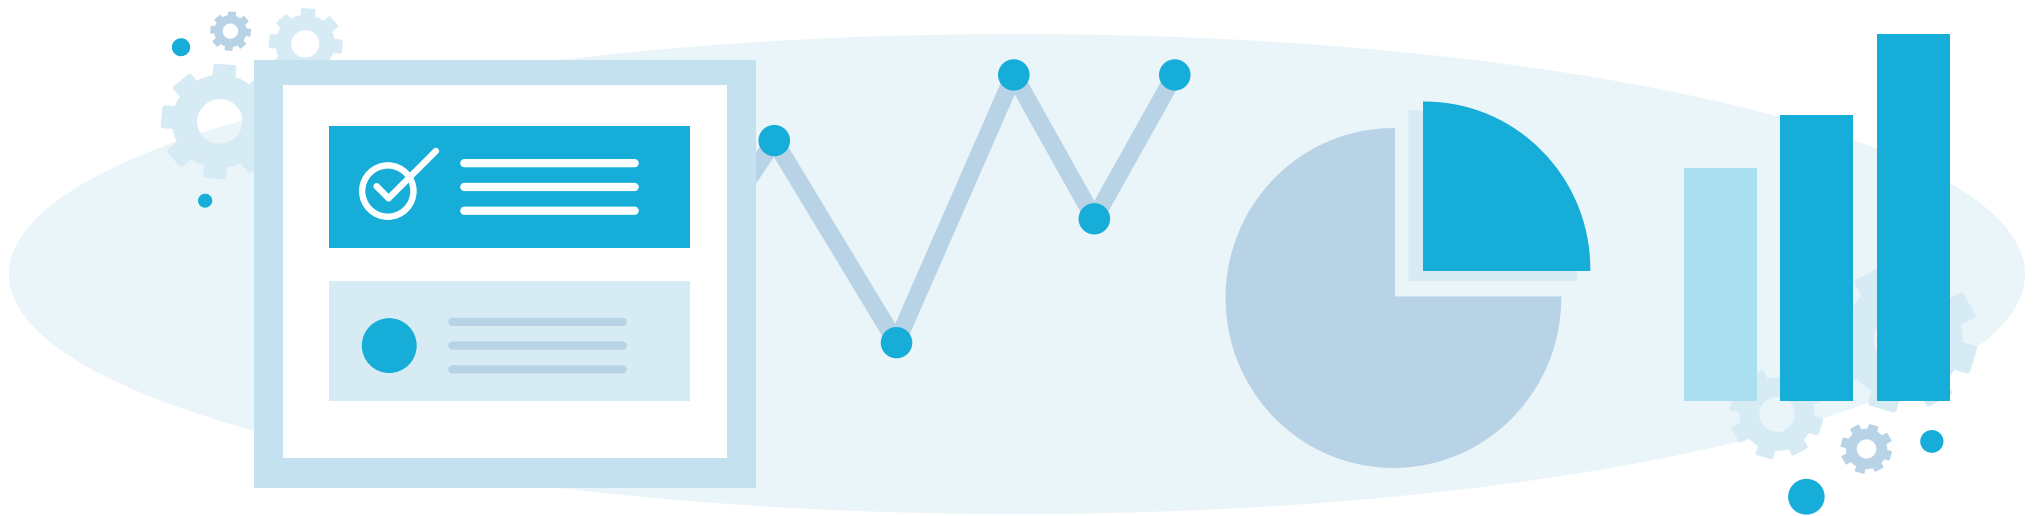

ONE COMPREHENSIVE SOLUTION

Facilities and maintenance teams manage a variety of tasks - let them do it all in one software system. This allows you to support technicians, where and how they prefer to work, with one tool. FMX helps you manage work orders, preventive maintenance, assets, inventory, and more in a cloud-based, easy-to-use solution.

CONSOLIDATED MAINTENANCE REQUESTS

Lost work requests, missing information, and a lack of prioritization of tasks slows everyone down and impacts how work gets done. With FMX, you can consolidate all of your maintenance requests into one place that is accessible by everyone on the team, anytime, and on any device.

AUTOMATE TASKS

Why wait for paper-based processes and spreadsheets when you can operate in real-time across the organization? FMX takes care of that with triggers, alerts, and notifications to get everyone on the same page, and keep them there until the project or task is resolved.

MEASURE IMPORTANT METRICS

What gets managed is what gets measured. FMX gives you powerful reports and dashboards into all of your work orders, preventive maintenance, and asset information. This allows stakeholders to quickly understand what's working, what's not, and what needs attention so that you can make data-driven decisions.

MANAGE UNIQUE WORKFLOWS

Have a process that fits outside of your current system or processes? FMX has helped hundreds of customers manage their most complex processes with a configurable module capability that allows for almost infinite customization and configuration to your needs.

“We chose FMX for our new plant because it offered our staff the ability to work anytime, anywhere, on any device with an ease-of-use that others couldn’t match. The software is also continuously updated with new capabilities and is cloud-based so it’s easy and cost-effective to manage.”

— Seth Morrison, Staff Engineering Manager, Faultless Linens

WE'RE HERE FOR YOU

Getting started with a mobile initiative and need guidance on devices? FMX recommends CNET.com for the latest and greatest information on selecting the right laptops, tablets, and smartphones for your organization's needs. FMX can help you manage all of your facility needs anytime, anywhere, and on any device. We offer the following capabilities:

- Planned Maintenance Scheduling
- Reporting and Analytics
- Inventory & Asset Management
